

Mexican Mission Ornament Template
a free pattern from www.b-muse.com

Cut 2 of 140# water color stock or similar sturdy cardstock - one for back and one for the front. On the one you will use for the front with an Xacto knife or razor cut the center of the doors and the top and bottom. Score along the right and left sides. Punch out the circles at the corners of the doors of your template to mark the cut and fold lines on the front piece.

This template is created so that an Artist Trading card will fit exactly inside the “doors” but feel free to enlarge or reduce as you desire.

After you have finished embellishing both the back and the front align and attach them with dimensional glue dots to give your alter dimension.
